UserWay's AI-Powered Accessibility Widget leverages artificial intelligence (AI), Machine Learning (ML), and computer vision technologies to support compliance and accessibility efforts. These automated technologies, coupled with human review and approvals ("Human in the Loop"), are designed to help your site align with WCAG guidelines.

This report provides insights into the site's accessibility progress with its comprehensive list of the issues identified as of the date of report generation.

UserWay's software continuously monitors and addresses accessibility issues detected on this site based on UserWay's WCAG Automated Remediation Technology (ART). UserWay aims to apply the latest requirements, rule bases, and updates as the W3C (the World Wide Web's standards body) releases new WCAG guidelines and adapts existing guidelines to evolving technologies, browsers, and devices. WCAG is widely recognized as a foundation for legal accessibility requirements under frameworks such as the ADA, AODA, EN 301 549, RGAA, and other regulations around the world.

# Accessibility Violations by WCAG Criteria

## Image lacks a required 'alt' attribute (Level A)

Checks that each image has an alt attribute with a sufficiently clear and concise description to convey the meaning of the image to visually impaired users relying on screen readers and other assistive technologies.

URL	5 Occurrences	Status	Detected on
<a href="pbmprd.org/parks/dog-park/">pbmprd.org/parks/dog-park/</a>	2	Remediated	Desktop
<a href="pbmprd.org/home/announcements/">pbmprd.org/home/announcements/</a>	1	Remediated	Desktop
<a href="pbmprd.org/parks/western-town-community-park/">pbmprd.org/parks/western-town-community-park/</a>	2	Remediated	Desktop

## Frame lacks a populated 'title' attribute (Level A)

Checks that all frames have populated title attributes. Users who rely on screen readers or other assistive technologies often use shortcut navigation methods to view a list of frames and their title attributes. A descriptive title attribute that identifies the frame's content or purpose helps these users.

## Link lacks descriptive text (Level AAA)

Checks that each link contains descriptive text that clearly and meaningfully describes what will happen if the user selects it. Without descriptive text, a link can confuse users who rely on screen readers or other assistive technologies. If it is not possible to add link text, add an 'aria-label' attribute to describe the link instead. Or, if the link is necessary for the programming or functionality of the page but is not intended for user interaction, add an 'aria-hidden' attribute to hide it from screen readers.

URL	101 Occurrences	Status	Detected on
<a href="pbmprd.org/">pbmprd.org/</a>	6	Remediated	Desktop
<a href="pbmprd.org/contact/">pbmprd.org/contact/</a>	6	Remediated	Desktop

<a href="pbmprd.org/home/announcements/">pbmprd.org/home/announcements/</a>	6	Remediated	Desktop

## Page should have a single <h1> element (Level AA)

Checks that the page has a single <h1> element. Structuring pages with a logical and predictable heading hierarchy allows users to easily find information and more efficiently navigate the page. Users relying on screen readers and other assistive technologies should be able to understand the page structure by quickly skimming the page. Each page should have a single <h1> element under which all subsequent headings (<h2>, <h3>, etc.) should semantically fit.

<a href="pbmprd.org/home/announcements/">pbmprd.org/home/announcements/</a>	8	Remediated	Desktop

## Form field lacks a <label> element (Level AA)

Checks that each form field has an associated <label> element or descriptive text. Without labeling or description, users who rely on screen readers or other assistive technologies cannot determine the input requested.

URL	49 Occurrences	Status	Detected on
<a href="pbmprd.org/contact/">pbmprd.org/contact/</a>	11	Remediated	Desktop
<a href="pbmprd.org/home/announcements/newsletter/">pbmprd.org/home/announcements/newsletter/</a>	12	Remediated	Desktop

## New tab or window opens without warning user (Level AAA)

Checks for new tabs or windows opening without warning user. New tabs or windows can be very disorienting for users, particularly those who rely on screen readers or other assistive technologies. Any link that opens a new tab or window should communicate this fact beforehand.

URL	633 Occurrences	Status	Detected on
<a href="pbmprd.org/">pbmprd.org/</a>	28	Remediated	Desktop
<a href="pbmprd.org/contact/">pbmprd.org/contact/</a>	22	Remediated	Desktop

<a href="pbmprd.org/home/announcements/">pbmprd.org/home/announcements/</a>	23	Remediated	Desktop

## Broken link (Level A)

Checks for broken links. All links should point to live sources. Broken links diminish the user experience for all users but especially for blind users and for users with low vision, mobility impairment, or cognitive disabilities.

URL	4 Occurrences	Status	Detected on
<a href="pbmprd.org/">pbmprd.org/</a>	1	Remediated	Desktop
<a href="pbmprd.org/home/announcements/newsletter/">pbmprd.org/home/announcements/newsletter/</a>	3	Remediated	Desktop

## Vague or undetermined link purpose (Level A)

Checks for vague link text that does not provide clear information on where the link leads to. Users who rely on screen readers or other assistive technologies often skip forward or backtrack to locate links. They need link text to be substantive. Vacuous, meaningless link text like click here, click this, download, etc. tell users nothing about what the link points to.
